

2017-2022: Five Years of Operational Success

Interstate Medical Licensure Compact Commission

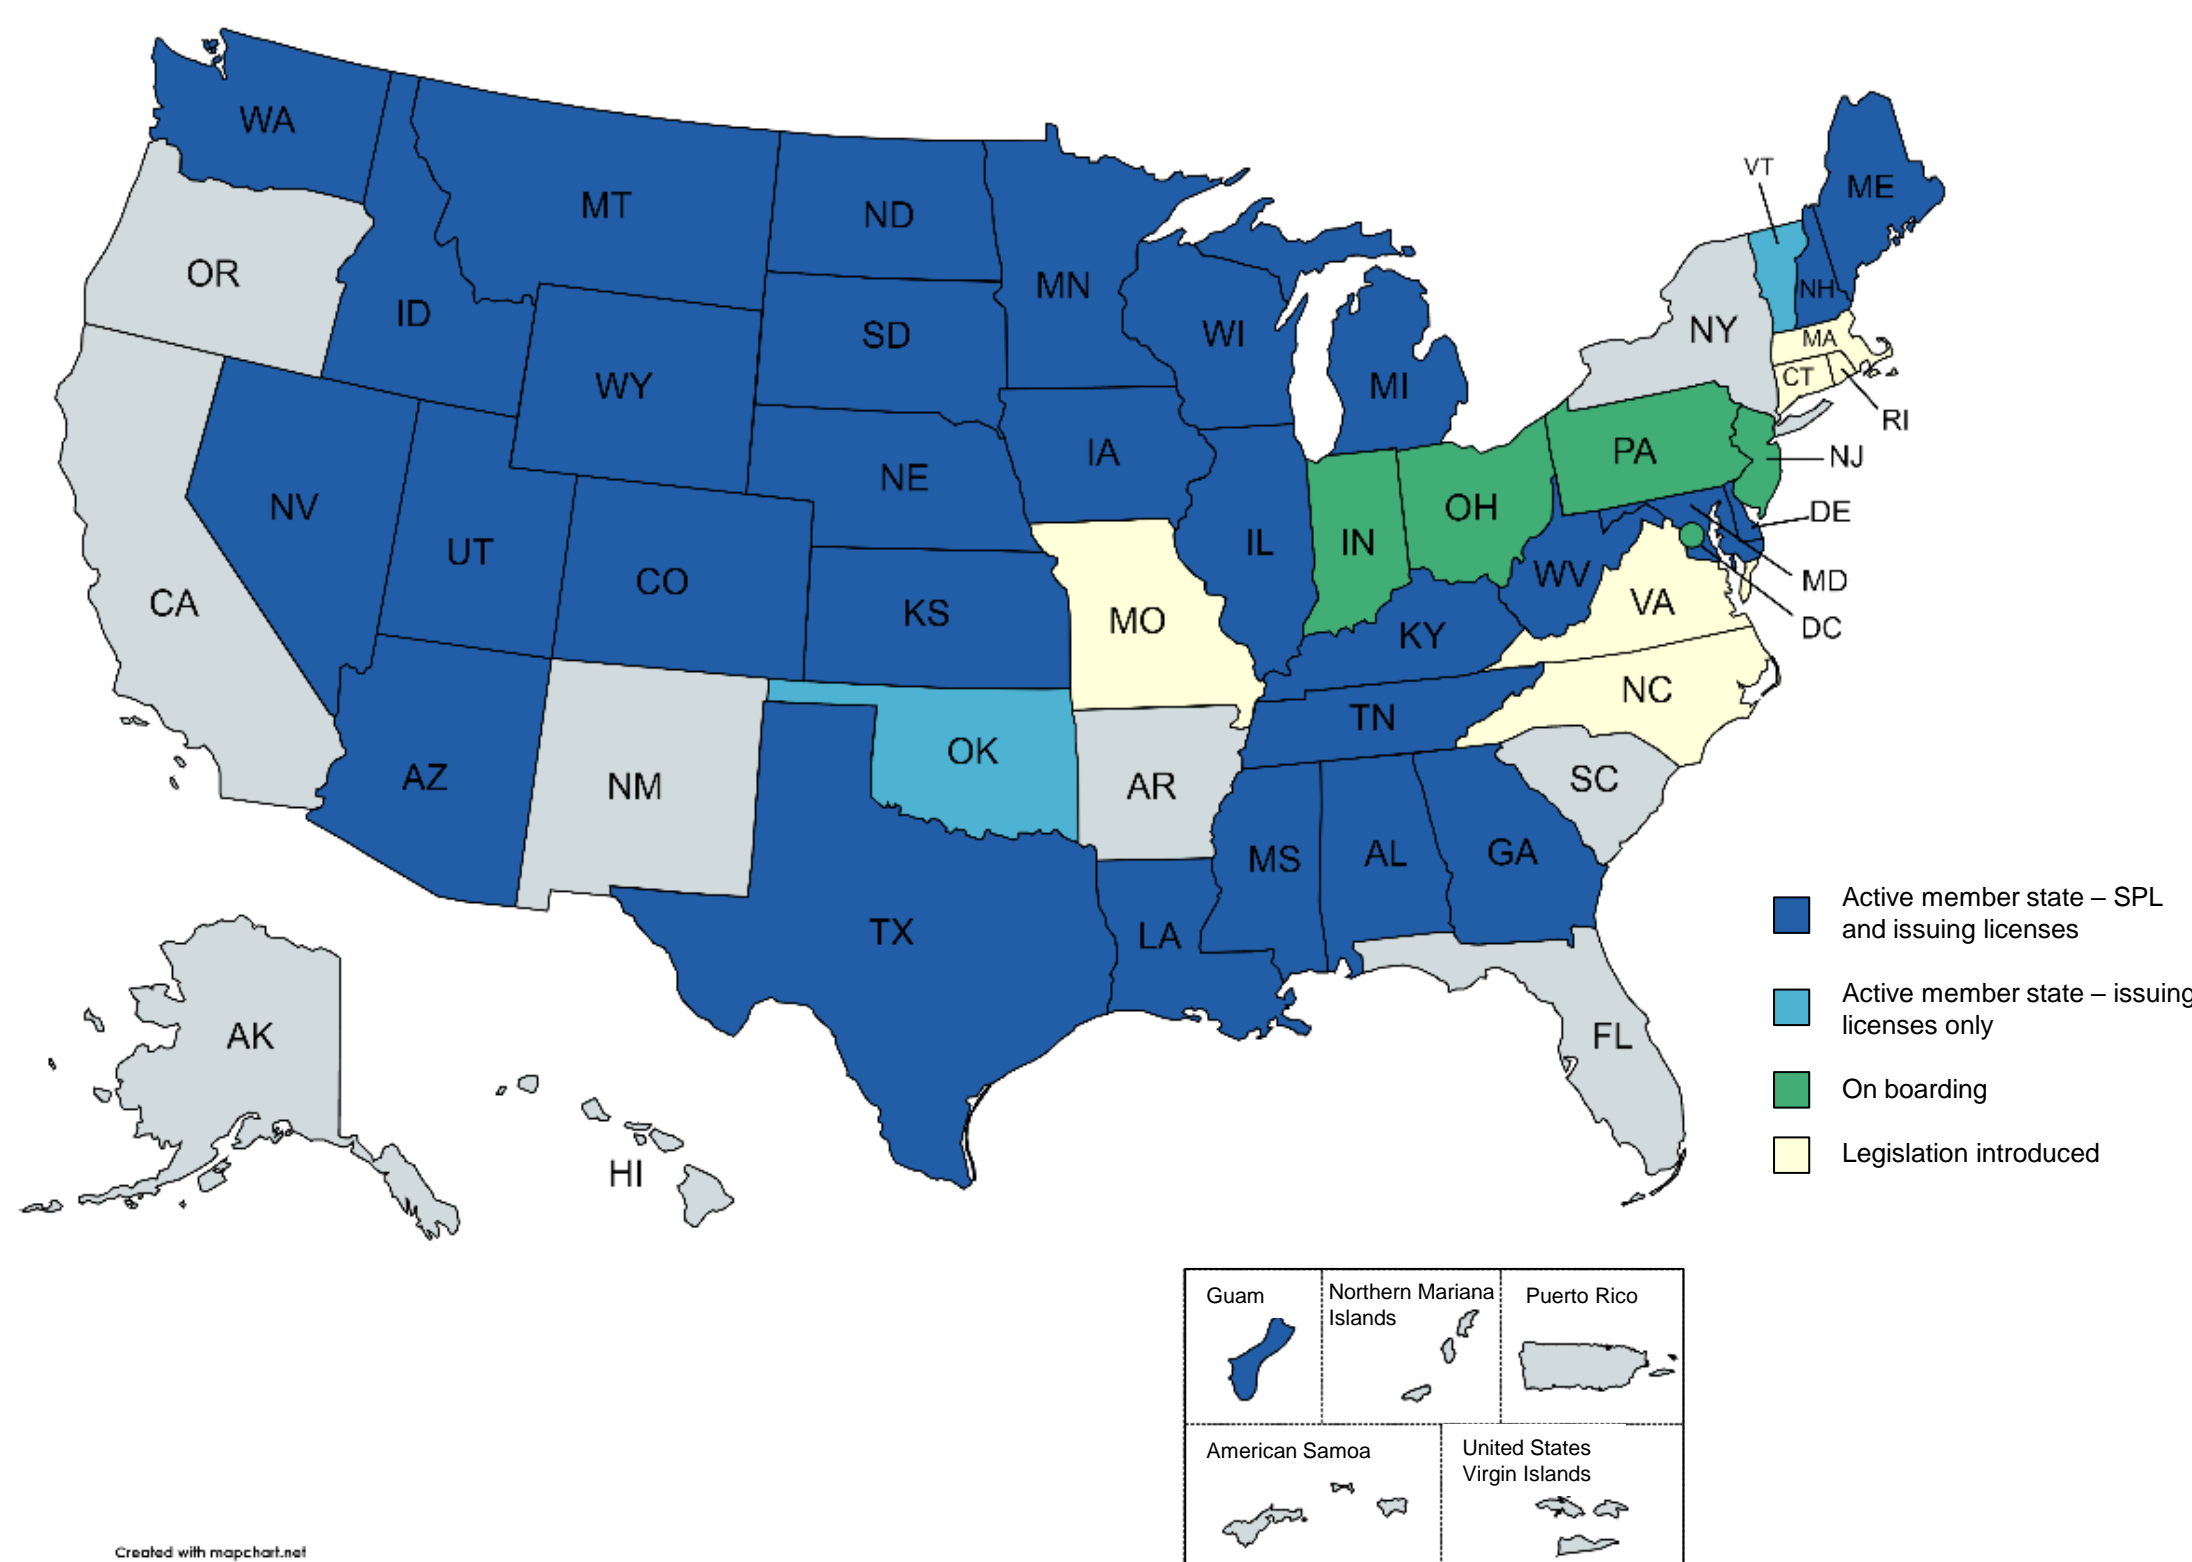

Compact Overview

Key Points:

- The IMLCC process is available to physicians:
 - Doctors of Osteopathy (DO)
 - Doctors of Medicine (MD)
- The IMLCC provides a streamlined, cost-effective process for physicians to obtain a full, unrestricted license from a member state.
- The license is issued by the member state's board and is subject to that state's practice of medicine requirements.
- The IMLCC is a governmental instrumentality controlled and governed by the member states. There is no outside control or governance.
- The IMLCC became a legal organization in April 2015 when Alabama became the 7th authorizing state.
- The first application was processed April 7, 2017 and the first license using the compact process was issued 13 days later.

The Compact Map

To participate in the Compact, a state's legislature must introduce and enact a bill authorizing the state to join. The language of the Compact must be consistent in each state that joins. The Compact's terms are made possible when the formal legislation is adopted and signed into law.
